

Delaware Park Finder Application

User Guide

Park Finder Application

The Park Finder application assists the residents and visitors of Delaware in finding stuff to do, more specifically; it assists in finding parks and trails within Delaware. To get acclimated with the application we will take a quick tour and identify each of the buttons and feature of the application. There are several buttons to get you started; the following will describe each.

Delaware Park Finder Application

User Guide

Map Zoom

Zoom in and out of the map. The same can be accomplished by using the scroll up and down wheel on you mouse or on a mobile device using a pinching motion with your finger and thumb on the mobile device screen.

Find Location

Click the Find button to display the 'Find Location' dialogue box and enter an address to search. Click the 'X' to close the 'Location Finder' when finished.

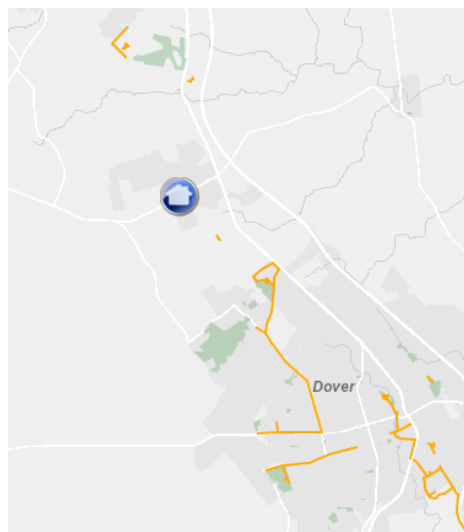

Enter your search

Point identifier

Upon finding the location you will see an icon identifying the location of you search results. Additionally, your screen will zoom to the resulting location.

Feature Details

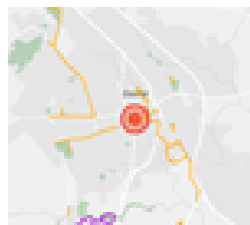

Each item on the map can be selected to reveal additional details and the ability to Zoom to and center on the selected object.

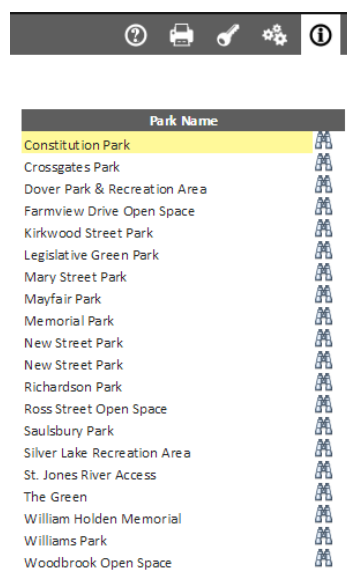

Geo-Location Zoom

When the Geo-location identifier button is selected the screen will reposition and zoom into your location, if on a mobile device with GPS activated or Dover, Delaware, which is the default location. The screen will display a Bullseye instead of the house icon that is used to identify the results of the Location search.

Also notice that the Results screen has changed to reflect the new search. According to the search Results there are no trails within Dover.
